

SMATSA chooses COMSOFT Solutions for AMHS and ARTAS upgrade

Comsoft Solutions provides enhanced functionality, reliability and performance with the upgrade of AMHS and EUROCONTROLs ARTAS Tracker for Serbia and Montenegro

Serbia and Montenegro Air Traffic Services Llc (SMATSA Llc) will upgrade their current AMHS solution and ARTAS system with Comsoft Solutions in order to maintain and enhance safe and efficient air traffic within the SMATSA Llc Area of Responsibility.

The upgrade will include the ability to import AMHS address tables, to export statistical information and be upgraded with European Directory Service (EDS) functionality. Additional CADAS-ATS flight planning servers will also be included as well as training for all new functionalities. ARTAS will also be upgraded to the latest V8B version on a new hardware platform (as defined by EUROCONTROL's CAMOS Service) and customised based on the EUROCONTROL Specification for ATM Surveillance System Performance (ESASSP) using COMSOFT Solution's RAPS-3 product and the EUROCONTROL Surveillance Analysis Support System for ATC-Centre (SASS-C) product.

Comsoft Solutions market-leading AMHS solution, AIDA-NG, and EUROCONTROL's renowned ARTAS surveillance tracker were first supplied to SMATSA in 2011 as part of their Future ATM Modernisation and Upgrade System (FAMUS) project. In 2012 SMATSA also opted for the AIDA-FPL flight planning tool from Comsoft Solutions, to assist with their transition to the new flight plan format.

SMATSA Llc is responsible for Air Traffic Control, Flight Information and Alerting Service in 145,566 square km of airspace, including the Republic of Serbia, the airspace of Montenegro, part of the airspace over the Adriatic Sea, as well as 55% of the upper airspace over the territory of Bosnia and Herzegovina. Comsoft Solutions' AMHS product AIDA-NG provides fully integrated and uniform message handling facilities, while the data processing capabilities and tracking of EUROCONTROL's ARTAS further enhance the accuracy and reliability of surveillance coverage.

About Comsoft Solutions GmbH

COMSOFT Solutions GmbH was founded in 2016 from major assets of the previous COMSOFT GmbH, which was established in 1979. The company is now a member of the FREQUENTIS Group, with expertise that cover a vast range of the modern ATM industry, providing market-leading AMHS solution AIDA-NG, and innovative surveillance and communication solutions such as ADS-B and Multilateration sensors. Additionally, Comsoft Solutions has been EUROCONTROL's Industrial Partner for ARTAS maintenance and support since 2001 and is also a turnkey supplier of ARTAS systems. The high quality portfolio and skilled team, coupled with the FREQUENTIS Groups vast expertise, will continue to develop innovative solutions for the ATM Market, consistent with international standards.
